Node.js	Express.js	MongoDB	REST APIs	Sharp Observational Skills
HTML5	Typescript	Next.js	React.js	Effective Communication
CSS3	Redux Toolkit	Algorithms	Git	Strong Problem-Solving Abilities
SASS	Tailwind	Bootstrap	Web App Development	Object Oriented Programing

## PROJECTS

### Trendu - E-commerce Clothing Website

GitHub Repository: [Trendu](#)

Developed a responsive and dynamic e-commerce clothing platform using Next.js, React, and MongoDB. Integrated product filtering, user authentication, and shopping cart functionalities. Deployed on Vercel for production hosting. Implemented user authentication, a shopping cart system, and a MongoDB database for product storage and user management.

#### Key Features:

- Built with Next.js for server-side rendering and routing.
- Integrated MongoDB for database management.
- Product filtering and detailed view functionalities.
- User authentication and shopping cart system.
- Deployed on Vercel for production-ready hosting.
